

First QEMU Attempt

↓
make Run

↓
make ISO

↓
build / nucleus.iso

↓
QEMU

↓
Limine boot loader

↓
NucleOS entry

↓
boot(); / boot/kernel.plf

↓
black screen

What happened?

- ✓ ISO booted
- ✓ Limine appeared
- ✓ NucleOS entry appeared
- ✓ kernel path was found
- ✗ Lower-half ELF issue fixed

Interpretation:

kernel likely loads, but has no text output yet.
